Alongside the above facts, children also need to be able to solve these calculations with automaticity by the end of Year 2. They must also be able to solve the corresponding subtraction calculations. Children should continue to practice these in Year 3 to secure and maintain fluency.

Alongside the above facts, children also need to be able to fluently recall their times tables by the end of Year 4. Pupils must also have automatic recall of the corresponding division facts. The 36 most important facts are highlighted in the table. Fluency in these facts should be prioritised because, when coupled with an understanding of commutativity and fluency in the formal written method for multiplication, they enable pupils to multiply any pair of numbers.
